

# OCD SCATEGORIES - HOLIDAY EDITION

brought to you by OCD Family Podcast, LLC

Directions: Pick a list and letter for all players to use each round. Set a timer for 90 seconds, and start generating as many answers as you can with words or phrases using the designated letter. Once the timer is complete, go around and share your responses with the group. Players get 1 point for each unique answer not provided by any other players that round. The player with the most points at the end wins.
